

Introducing the **NEW** Nanoform[®] 250 Ultragrind

This revolutionary, flood coolant compatible, 4-axis Freeform ultra precision machine is designed for:

- Diamond turning challenging materials, such as Silicon.
- Deterministic Freeform grinding of optical mold inserts, such as tungsten carbide for glass pressing applications, or direct grinding of glass.

Unprecedented Performance Utilizing:

Program Resolution: **0.1nm**

Feedback Resolution: **16 picometers**

Advanced vibration Isolation System
