

The Verdict Is In...

The **New Nanoform[®] 250ultra** is the Highest Performing Ultra Precision Machine ever built.

Performance Highlights:

- The **Most Accurate** Part Cutting performance
- The **Straightest and Stiffest** Structural Loop in its class
- The **Most Advanced Control System** in the Industry
- The most **Robust and Productive** machine designed for Research and 24/7 high-production environments

Configuration Options:

Single Point Diamond Turning, Tool Normal Diamond Turning, High Speed Machining, Raster/Groove Milling, Fly-cutting, Non-rotationally symmetric Freeform Machining; Fast Tool Servo, Slow Tool Servo, Grinding (Parallel, Cross and 45°)

Machine on display at:

Defense & Security Symposium – April 18th – 20th, 2006
Kissimmee FL, USA
Hall D, Booth: 1327
Optatec – June 20th – 23rd, 2006
Frankfurt, Germany
Hall 3, Booth: H32
