

Specialized Systems

Precitech has produced a variety of special application systems as illustrated below. Call one of our qualified sales representatives to discuss your specific application needs...

Modular Gage

Cylindricity Gage

Roundness Gage

Customer Support

At PRECITECH INC., our experienced service and applications engineering staff is dedicated to helping you meet your precision geometry measurement requirements long after the sale and installation of a circular form measurement system. Our manufacturing operation includes a toolroom which can provide specialized tooling or fixturing for custom applications. All FMS systems are engineered and manufactured in Keene, NH, USA.

Whether for lightweight parts, or heavy-duty parts up to 5000lbs, let us demonstrate how PRECITECH MODULAR FORM MEASUREMENT SYSTEMS can cost-effectively enhance your precision geometry measurement capabilities.

For additional information, to request a quotation, or to arrange a visit to our manufacturing facility for a product demonstration, contact us today!
