PEPS® II-VX

Active on machine vibration cancellation and precision leveling system

PEPS® II-VX is a digital non-contacting, height control and active vibration cancellation system. A version ideally suited for ultra precision machining, was jointly developed by Precitech and the vibration experts at TMC. It is exclusively available as a retrofit on Precitech machines in the field and as an option on all new machines.

PEPS® II-VX works with the existing pneumatic vibration isolation system eliminating the mechanical height control valve and height sensing linkage. The result is a first-of-its-kind active on-machine vibration isolation and precision leveling system.

All vibration isolators have a first fundamental resonant frequency. Isolators actually amplify instead of attenuate vibrations that are near to this frequency as is shown in the graphs below. The lower the value for this resonant frequency generally the better the isolator. TMC MaxDamp® isolators are excellent in this regard with a resonant frequency of < 2 Hz. PEPS II-VX provides the first low cost solution for this universal condition by providing active vibration cancellation in the critical frequency range of 0.7 to 5 Hz.

Since 1962, Precitech has delivered complete ultra precision solutions and maintains an installed base of over 1,500 systems worldwide. We continue to define the state-of-the-art, enhancing accuracy, productivity, and ease of use.

Precitech is ultra precision machining solutions.

**Physical Dimensions**

PEPS II Controller: 1.72 in. (43.7mm) H x 8.0 in. (203mm) W x 9.4 in. (240 mm) D

**Weights**

PEPS II Controller: approximately 3.0 lb (1.2 kg)

**Environmental**

For indoor use only, up to an elevation of 2,000 m (6560 ft.)

- Maximum allowable temperature range: 5° C to 35° C
- Maximum allowable humidity: 80% up to 31° C, decreasing linearly to 50% relative humidity at 40° C
- Tolerance in main supply voltage: ±5 VAC - 240 VAC
- Over voltage category: 2
- Pollution degree (IEC 664): 2
- Ventilation requirements: 25 mm clearance on sides, 0 mm top and bottom

**Power Requirements**

- Power input voltage range: 90-230 VAC
- Input frequency range: 50-60 Hz

**PEPS II User Interface**

- Power switch
- 4 menu buttons
- LCD display 20x2 characters
- 2 diagnostic sockets (BNC-type)
- Three-color status LED
- USB port

**PEPS II Interface**

- AC power entry with EMI filter
- 1 air INPUT snap-in port for 1/4 in. OD tubing
- 1 air OUTPUT (Exhaust) snap-in port for 1/4 in. OD tubing
- 4 air snap-in ports for 1/4 in. OD tubing (one per isolator)
- DB-25 male inputs-outputs and feedforward socket
- 1 Phoenix 0.2 in. pitch 6 pins GREEN header (vertical proximity sensors)
- 1 Phoenix 3.5 mm pitch 6 pins BLACK header (horizontal proximity sensors)
- Grounding threaded stud (#10-32 thread)
- DB-25 F socket: 1x digital Input, 3x geophone sensors interface (~'VX' option)
- DB-25 F socket: 1x digital input, 3x current output proximity sensors (optional)

**Performance Specifications**

- Analog inputs (unipolar): 8x12 bit (16 bit using over sampling), 0…3.0 V full scale
- Analog inputs (feedforward, diag.I): 5x12 bit (16 bit using over sampling), 0…9 V full scale
- Analog inputs (feedforward, diag.II) protection: ±5 Volts clipping
- Analog outputs: 4x12 bit (16 bit with over sampling), 0…3.0 V full scale
- Analog outputs (OPTIONAL): 8x16 bit, 0…3.0 V full scale
- Analog output protection: indefinite short circuit protection, ±5 Volts clipping
- Digital input voltage rating: 0…+3.3 V, +5 V tolerant (+5 Volts clipping)
- Digital output rating: 0…+3.3 V, 20 mA max.
- Digital I/O protection: +5 Volts, ±0.5 Volts clipping
- External available power: ±5 VDC, 2.0 A max; ±15 VDC, 1.0 A max. (20 Watt max)
- Communication port: USB, appears as RS-232 on PC
- Processor: ARM7TDMI / 41.78 MHz
- Control loop rate: 100 Hz – 2.0 KHz
- Proximity sensors: 3x vertical, 3x horizontal optional. Eddy current NAMUR 0-20 mA output
- Velocity sensors - geophones (~'VX' option): 3x vertical, current output

**Pneumatic Specifications**

- Long-term height stability: ±50 microns
- Long-term tilt stability: ±50 micro radians
- Servo valves: 4 x 2-way variable-orifice proportional servo valves
- Valving technique: pure class-A
- Maximum input pressure: 120 PSI or 8.3 Bar or 830 KPa
- Nominal air consumption: 60 s/cfm (2 scfm)
- Air requirements: clean, dry air, filtered to 20 microns or better
- Fail safe: isolators deflate on power failure or power off
- Pneumatic fittings: ‘one-touch’ quick fittings for 1/4 in. O.D. hose
