

A Grand Occasion at

Precitech has recently completed the sale of its 1000th machine, a true milestone in the North American Machine Tool Industry.

The Nanoform[®] 250 ultra and a few employees that made it happen

The Nanoform[®] 250 ultra was introduced earlier this year and has quickly become recognized as the most accurate and productive ultra-precision machining system in the industry.

II -VI Infrared of Saxonburg, PA, a longstanding collaborative partner, are the proud owners of this sophisticated system. The Nanoform[®] 250 ultra adds to the lengthy inventory of co-developed technologies, pushing the optics industry to even higher levels of performance.

*"II -VI is excited to be taking delivery of Precitech's 1000th machine. We are confident that the Nanoform[®] 250 ultra will continue Precitech's tradition of providing excellent technology and good fundamental value."
Alan Hedges, II -VI INFRARED*

The 1000th machine and a signed panel await delivery to II-VI INFRARED

Come visit the 250 ultra at Booths 101 & 103
